- we have put max buy in presale to 10 solana to make sure no whale dumps at launch.
- We have submitted application to moonshot.money so we can be verified on there so getting in early during presale is so much profit to hold.
- Our connect on Bybit and Binance says listing won't be an issue once we hit a certain MC.
- 100% supply of the project is community driven, Dev is not holding a single % of the supply.
- We have good connection to help us push this project everywhere at launch. The whole world will jump on it even trump will hear about this project. Hehehe then mars is the stopping point.
- We will shill this project everywhere that President Donald trump will feel the wave and talk about us.
